

VANTA | Health Node Pitch for Wes

Health Node | Strategic Opportunity

Wes,

You've always looked out for me. Right now, I need to go all in. I'm working with someone who sees the whole board.

Together, we're building a health app unlike anything out there - it's not just medical. It's about power. Privacy. Control.

Imagine this:

- Instant pill identification through camera scan.
- Bloodwork upload & private AI diagnostics.
- Custom health tracking for individuals, families, even entire companies.

Phase One is already prototyped. Kyle's helping. Christina and I are ready. We want to come to your ranch, finish the build, and launch with strength.

I'm asking for \$10,000 - not just to cover some immediate needs (rent, escape, breathing room), but to stake in the system we'll use to heal and take territory.

This isn't a favor. It's an early buy-in.

We're coming out healing - and armed.
